

OneSort® Pro

A robust, feature-rich parcel and flats solution.

For more information, visit us online: bluecrestinc.com

For clients requiring an efficient and cost effective means of rapidly processing parcels, letters and flats, the BlueCrest OneSort Pro offers sophisticated functionality with remarkable simplicity.

Ideal as either a first step to automation and data capture or as a complementary system for exception processing, the OneSort Pro delivers all the accuracy and precision your business needs.

Simultaneously reading and capturing item weight, dimensions, barcode and OCR data, the OneSort® Pro instantly processes instructions for labeling, routing, postal documentation, client billing and custom reporting.

The OneSort Pro system utilizes the same Business Logic Processing (BLP) software that drives all BlueCrest letter, flats and automated parcel sorting solutions. The BLP software is a dependable platform providing seamless integration into WMS and shipping systems.
